Help Us Get Started The Right Way

We are about to begin the rehab on the house for the Women and Children's Life House. The goal of the rehab is to get the house to the place where we can begin to house women who have a child or children who have no place to go. Our target date to open is this coming October.

This ministry is going to be a blessing. It's going to be a blessing to mothers and their children. It's going to be a blessing to the Huntington community and to the state of Indiana. It's going to be a blessing to the partners of New Life Ministries as they see the workings and growth of their partnership in its continuous ministry of helping people. It will surely be a blessing to the people of New Life Fellowship as they see how God takes the vision of 2005 and fulfills more of it. In the bible, Jesus tells a parable called The Good Samaritan. It is about a man who is beaten, robbed, and left for dead. Everyone who saw him walked by and never helped the man. In fact, they just walked around him. But, later a Samaritan came by saw him

and helped the man. He then upon arriving into the city put the man up in an inn. He paid the inn keeper and then said take care of him and if it cost more I will pay you when I get back.

We at New Life Ministries are like the inn. God has called us to do the same thing, take in broken people. It's humbling knowing that he has called us to open up another inn. This time we will be taking in women with children.

Please pray for this ministry, the staff that will be serving there, the funding of the rehab, and for God to continue to bless New Life Ministries. We can not do this without our Lord and we can not do it with you. So, help us get started the right way. Please make this an important part of your prayer time. Jesus said that faith the size of a mustard seed can move a mountain from here to there. It's going to take prayer and faith. Help us with prayers and faith. Thank you all.

Caring For One Another

Many times residents of the Women's Life House get sick. And for the most part in a day or two they are well and back to being busy. But, once in a while it's more than just a cold or flu. Sometimes they end up in the hospital for more serious things.

When something happens to a resident it effects the whole house. The ladies spend a lot of time together and they become attached and to one another.

Recently we had a resident who became very sick. She ended up spending time in the hospital. She just got her new apartment and before she was able to move in she got

sick. The ladies piled up in a car and took a ride to Ft. Wayne to make a visit. They made a couple of visits and after few weeks she was in her new apartment and feeling better.

The ladies of the house learn many things. One of those things that we hope they learn is to care about others and not just about self.
